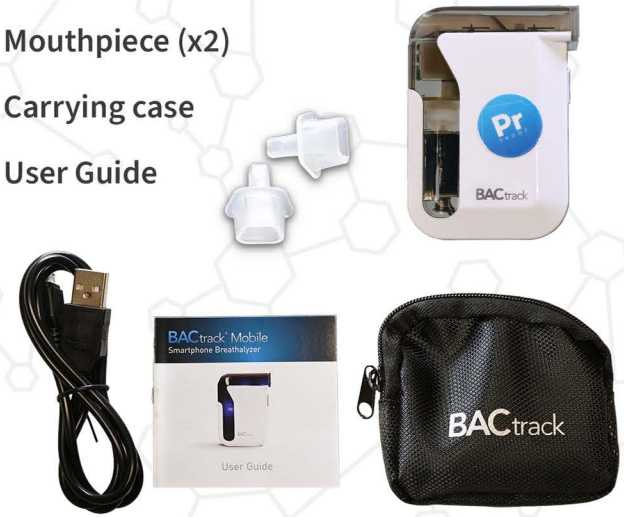
PROOF

Breath Kit

What's Inside

- ✓ BACtrack Smartphone Breathalyzer
- ✓ Micro-USB charging cable
- ✓ Mouthpiece (x2)
- ✓ Carrying case
- ✓ User Guide



Before You Begin

Download the PROOF+ App from the App Store onto your mobile device.

Go to Settings on your mobile device and make .sure Bluetooth® is switched on. Pairing takes place within the PROOF+ App, but Bluetooth® must be switched on in Settings first.

Press and hold the Power Button on your BACtrack Mobile Breathalyzer for two seconds, then release, powering it on and allowing it be found. No cords or adapters are needed. Open the app from the home screen and press the "Pair your BACtrack" button.

Tips for a Successful Collection

The PROOF app will walk you through the steps of your collection using audio, visual, and text prompts.

For most accurate results, it's important to wait at least 20 minutes after smoking, eating or drinking before testing. This is a universal principle for all breathalyzers, not just yours. The reason being is that if you have recently consumed alcohol, the residual alcohol in your mouth is very high and can cause a false reading. Additionally, waiting 20 minutes allows the alcohol to be absorbed from your stomach into your bloodstream, contributing to more accurate test results.

DO

- ✓ Retests should not be done any earlier than 10 minutes, no later than 20 minutes - *ideally 15 minutes from the first test.*
- ✓ While testing, hold your Smartphone device at eye level and look directly into the device's camera.
- ✓ Remove sunglasses and headwear during testing.

DO NOT

- ✗ Do not cover, hold, or obstruct the MobileBAC device's mouthpiece during testing or permit any item to block the user's ability to breathe into the device.
- ✗ Do not test in areas where large amounts of alcohol is being consumed or in areas with strong winds, smoke, or chemical substances.
- ✗ Do not blow smoke, food, or liquids into the MobileBAC device, as this will damage the sensor.

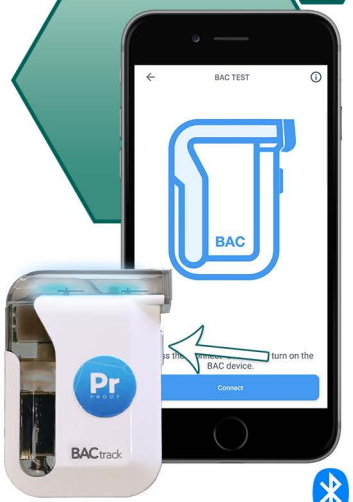
PROOF Breath Kit Instructions

1 Pair your breathalyzer

Download the free PROOF app. (available for iTunes and Android)
Go to the Settings on your mobile device and if needed, turn on Bluetooth.
Turn on your BACtrack Mobile Breathalyzer.
Go to the PROOF app. (the app will automatically connect to BACtrack via Bluetooth)



Bluetooth®

2 Connect BACtrack Mobile Breathalyzer to Mouthpiece

Locate BACtrack Mobile Breathalyzer and Mouthpiece.
Connect the Mouthpiece to the BACtrack device.

3 Take a reading

To ensure accurate results, it is important to wait at least 20 minutes after smoking, eating or drinking before testing.

Click "BAC Test" icon in the menu.

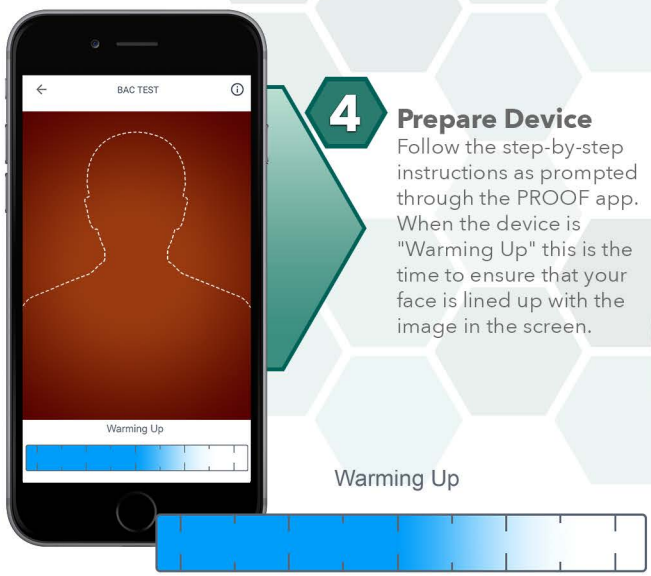
In order to start the test you must verify your identity.

After verifing your identity, read and agree to each item before selecting "Next"

PROOF

4 Prepare Device

Follow the step-by-step instructions as prompted through the PROOF app. When the device is "Warming Up" this is the time to ensure that your face is lined up with the image in the screen.



5 Blow into Breathalyzer

When the screen reads "Start Blowing," take a deep breath and blow into your breathalyzer firmly and continuously until the entire bar is filled in with color. You will be blowing for about five seconds. Keep blowing until you hear an audible ***"CLICK!"***

Make sure your hand is not covering the top of the breathalyzer. See correct way to hold device to the left.

6 Testing Complete

Once your BACtrack Mobile Breathalyzer has analyzed the breath sample, it will communicate with your mobile device, and your results will be uploaded to RecoveryTrek.

Device Error (Invalid Blow Detected) If you receive this error message, you will be prompted to try again.
